INTRODUCING
**MY
ELLEVATE®**

We are excited to introduce a new minimally invasive procedure: My Ellevate®. Unlike a face or neck lift, there are no incisions. Using light guided technology, permanent sutures are placed in the neck muscle (the platysma). The results are expected to last 3–5 years, with the only side-effects including mild bruising and swelling. My Ellevate can be combined with other procedures like liposuction to enhance final results.

IS MYELLEVATE® THE SAME
AS A THREAD LIFT?

No—this is a more precise and permanent solution than thread lifts. MyEllevate uses unique light guiding technology, allowing more precise guidance of the sutures

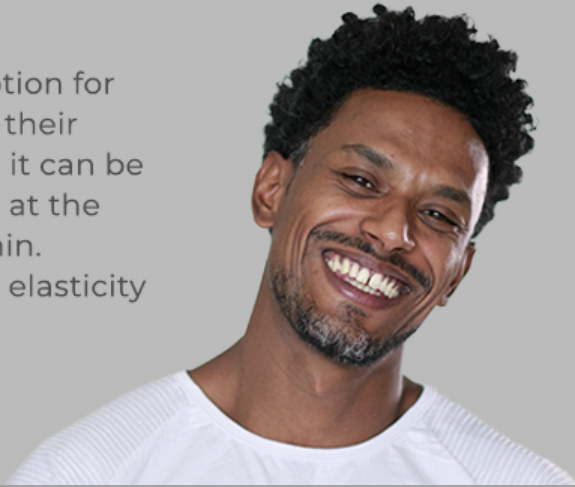

IS MYELLEVATE® THE SAME AS
A FACELIFT OR NECKLIFT?

No, a face and neck lift are surgical procedures that use incisions to directly visualize the underlying muscle and involve trimming extra skin. MyEllevate uses sutures to support the neck muscle.

WHO IS A CANDIDATE?

MyEllevate is a great procedure option for patients who see signs of aging in their face, neck, or jawline. In particular, it can be an excellent solution for loose skin at the jawline or poor definition at the chin. Candidates should have good skin elasticity and be non-smokers.

WHAT DOES MYELLEVATE® COST?

The procedure starts at \$3,000

Call [321.241.1160](tel:321.241.1160) to speak with one of our expert team members who will schedule you with Drs. Novo & Gasgarth, to create a unique treatment plan that is right for you.
