COLLAGEN STIMULATION AND SKIN HEALTH FOR SUMMER

SKINPEN MICRONEEDLING

SkinPen microneedling stimulates new collagen production to help smooth and firm skin by promoting elasticity and volume with no downtime! Additional option is to enhance with platelet rich fibrin or topical growth factors.

BEST FOR:

- Anti-aging
- Early fine lines
- Maintenance
- Scars
- Hyperpigmentation in sensitive skin
- In combination with Sculptra filler

Series of 3 monthly face treatments

\$800

NEW SUMMER PRODUCT HIGHLIGHT:

SUNISDIN

We now carry the sun protection supplement SUNISDIN, a once daily supplement that protects and prepares the skin for sun exposure. Key ingredient: VitAox Ultra, is an advanced combination of antioxidants, carotenoids and vitamin D formulated by dermatologists and nutritionists.

Protects the skin against sun damage and lessens premature aging.

Promotes healthy eyes and skin.

BEST FOR:

Take once a day in the summer or take once a day during outdoor travel or activities like water sports, golf or tennis.

FACE + BODY AESTHETIC SOLUTIONS by CUTERA

Trusculpt 3D

Trusculpt 3D is a perfect noninvasive treatment to target and slim trouble areas. This is not recommended for removal of extra or loose skin, this is a perfect treatment for small trouble areas such as inner outer thighs, love handles and lower abdomen with NO downtime.

Ideally paired with Alastin Transform reducing crepey skin of the body up to 60% when used *consistently twice a day for six months.

Save 10% on Transform when purchasing with your Trusculpt treatment.

A NEW SAFETY MEASURE THIS SUMMER

We are proud to introduce Violight UV-C light sterilization to our practice.

What is UV-C LIGHT STERILIZATION?

Ultraviolet sterilization is a method of disinfecting air and surfaces that uses ultraviolet (UV-C) light to kill or inactivate microorganisms by

physically destroying their nucleic acids and disrupting their DNA. UV-C does not use harmful chemicals. UV-C kills, bacteria, viruses, and fungus.

UV-C light sterilization is also one of the safest methods to purify the air. It kills pathogens that cause illnesses as well as contaminants that aggravate asthma and other respiratory conditions.
