

Reduce Fat Immediately with UltraSlim

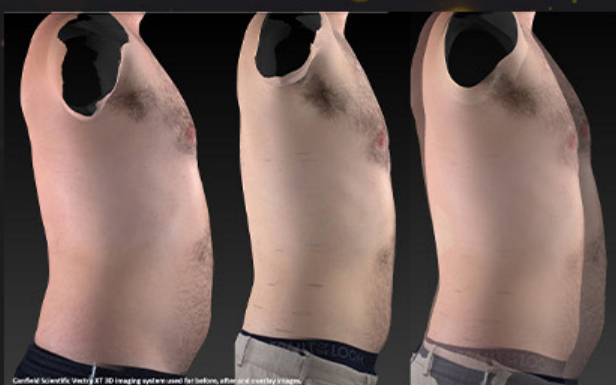

Unlike other non-surgical body contouring methods, UltraSlim works by shrinking your existing fat cells rather than destroying or removing them. Using a patented light and no-touch technology, UltraSlim causes pores in the fat cells to open and empty the cells' contents, releasing stubborn fat. This results in a one-third reduction in fat cell size in as little as 8 minutes. UltraSlim results are immediately noticeable, with patients losing an average of 3.5" in a single treatment session.

UltraSlim Clinical Trial Results:

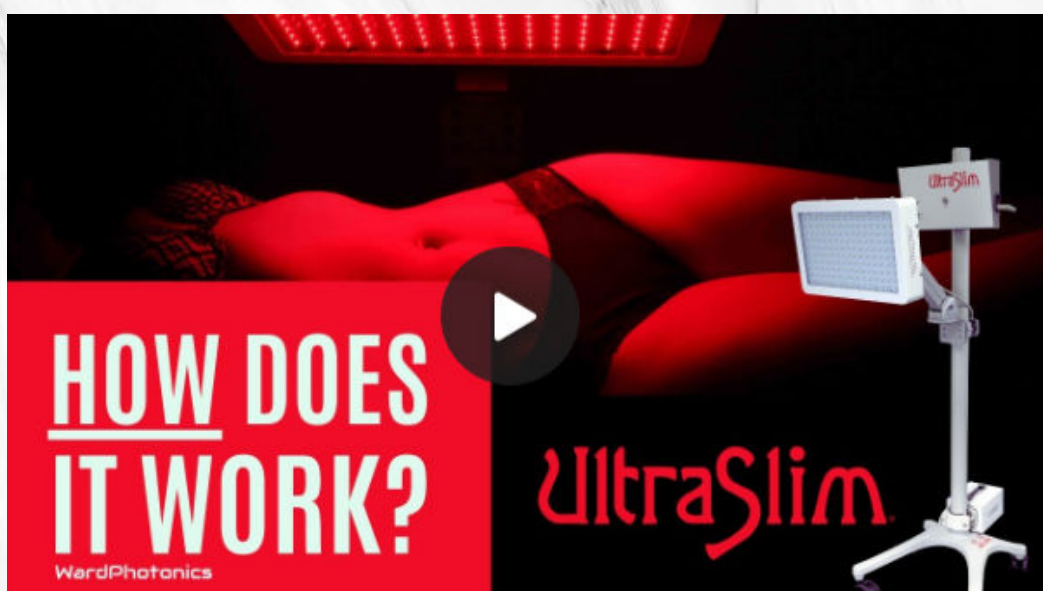

- Immediate and measurable results
- Lose 3.5" or 1,580cc of fat in 32 minutes
- Effective for all patients
- No side effects and no downtime
