A tummy tuck, which is also called an abdominoplasty, is a cosmetic surgery that is used to enhance the appearance and shape of your abdomen. Tummy tucks are a very manageable procedure with newer advances in pre-operative and post-operative care. Dr. Gasgarth will review who is a good candidate for surgery and when liposuction is recommended with or without a tummy tuck. She will also share before and after patient photos and answer your questions. Come learn how a tummy tuck surgery can help you look better on the outside and feel better on the inside!
