

Happy New Year!

Wishing you joy and health in 2024.

We wanted to take a moment to highlight our best innovative approaches for the year ahead.

What sets us apart is our physician specialist-led synergistic team. Our goal is to provide you with customized care, education and an exceptional & safe experience.

ANTEAGE MD® EXOSOMES

Communication messengers derived from stem cells that train the skin cells to act younger. Can be added to microneedling, laser treatments & Ellacor to enhance results and cut downtime in half.

Add to Treatment for \$275

VOLUX®

Add volume to improve the shape and structure of the lower face and achieve a contoured look in the jawline with results that last 1 year with optimal treatment.

Two Syringes \$1295

DAXXIFY®

The peptide based Botox alternative is made in the USA and offers staying power & premium results when done by an expert injector.

**Promotional Pricing: \$280
for Glabella Treatment**

SOFWAVE™

Ultrasound technology tightens lax skin under the neck, lifts brow, stimulates collagen, and improves lines (No downtime, works over time!)

Special \$500 Savings

RESTYLANE® EYELIGHT

Restylane Eyelight fills in the under eye area to help people look more refreshed, while maintaining a natural look and feel.

ALASTIN® A-LUMINATE

Clinically proven to help minimize the appearance of all forms of (unwanted) discoloration, including dark spots, age spots, hyperpigmentation, and brown patches without prescription strength ingredients! Safe for all skin types!

ELLACOR® MICRO-CORING

Ellacor micro-coring technology, now with 4 practitioners offering comfortable, in office, scarless skin removal (Dr. Novo, Dr. Gasgarth, Dr. Saluja, and Max Poling PA-C).

We recommend Ellacor for treatment of skin laxity of the lower face/jowl area, neck and body.

SKINVIVE™

The first and only hyaluronic acid microdroplet injectable indicated to improve cheek skin smoothness & chin texture helping the skin retain its natural moisture and softness leading to an improvement in the skin.

Special: 3 Syringes for \$1050

SAFE NONSURGICAL GLUTEAL AUGMENTATION

Also known as non-invasive or non-surgical buttock lifts, a popular cosmetic procedure that offers a safer, less invasive alternative to traditional surgical buttock lifts. The procedure involves the use of dermal fillers, Radiesse®, Sculptra®, Renuva® or other non-surgical treatments to enhance the appearance of the buttocks and to restore contour to the area.

BBL FOREVER YOUNG™

Recent research conducted by Stanford University indicates that exposing the skin to increased BroadBand Light (BBL) is beneficial. The highlighted study spanned a decade, tracking participants who underwent a series of monthly treatments followed by annual maintenance. The findings suggest that the more BBL treatments the skin receives, the greater the improvement in overall skin health.
