

EXCLUSIVE OFFERING BY  
DERMATOLOGY + PLASTIC SURGERY:

## *Synergy Lift*

Collaborative treatments, combining the best of  
aesthetic dermatology + plastic surgery.

Minimally invasively address aging in three  
dimensions: skin laxity, fat loss & bone loss.

### *How?*

By creating custom combinations of:

#### 1. FRACTIONATED CO2 LASER

Improve texture and complexion with this in office "skin polish" procedure. Expect the skin appearance and health to be 10-15 years younger/better with 5-7 days of mild - medium swelling and sandpaper that lifts to reveal smoother, brighter, more radiant skin.

#### 2. Y LIFT BY DR. SALUJA

To address volume loss associated with aging, filler is used to restore and redrape deeper tissue to improve facial shape and structure. This procedure has big impact on cheek highlights and reduces lower face and neck skin and muscle laxity by adding support to these tissues along the chin and jawline.

#### 3. BUSSO THREADLIFT

A unique skin rejuvenation technique to get an optimum lift, restoration, and rejuvenation of the face with PDO Threads. The BUSSOLYFT™ offers maximum rejuvenation by lifting facial fat pads brought down by gravity. The most common areas of treatment are the cheeks, jawline/jowl, and neck, as it can tighten sagging skin and give you a more distinct profile. It's also highly effective at addressing dark circles around the eye area.

#### 4. MYELLEVATE, AND MYELLEVATE+

The next generation of neck lifting surgery, MyEllevate offers less incisions (scars) than a traditional necklift and with a faster recovery. Combined with liposuction to contour the neck, and Renuvion (subdermal plasma energy) to tighten the skin. MyEllevate Plus includes muscle and skin redraping, using scars/incisions hidden behind the ears.

\*These procedures are performed in outpatient surgery center.
